

How Devana Solutions Helped Accellacare Integrated Site Network

Case Study

“

Devana Solutions® , LLC is a SaaS provider driven by a core belief that data transparency through technology is critical to selection of the top performing research sites to align with pharmaceutical sponsors and CROs to reduce drug development costs and cure disease.

The Challenge

INTEGRATED SITE NETWORK

A highly respected and top performing Site Organization was challenged with an inability to accurately measure turn-around times without cumbersome spreadsheets. This was additionally complex given its 14 locations and 54 investigative sites, spread across the mid-Atlantic region of the US.

The Solution

A goal of drastically reducing study start up time was put into place by the Leadership team.

The Result

FULLY-EXECUTED TIME IS CUT

Leadership team commits to adopting PROPEL organization wide, and within 6 months the sponsor/CRO feasibility request turnaround time average is reduced from 6 days to 4 days. Further, sponsor/CRO contract received to fully-executed time is cut from an average of 90 days to just 22 days, a 76% reduction in time.
