

Streamline processes and increase efficiency at your clinical research site.

LYNK UP is your one-stop shop for clinical trial workflow automation and reporting. Capture your site's progress through milestones and key document turnaround metrics to boost startup efficiency and trial performance.

Pipeline Management

Track and monitor trial opportunities from CROs and sponsors. Gain tangible insights from custom dashboards and reports to help drive buy-in and accountability.

Efficient Study Startup

Automate workflows by tracking and updating milestones throughout the study startup process. Leverage key metrics and performance reports to identify bottlenecks.

LYNK UP Features:

- Track trial pipeline opportunities
- Update and track study startup milestones
- Link email correspondence to trials
- Key performance reports and dashboards
- Track and update site profile and capabilities
- Manage Physician Investigator profiles
- Assign tasks to colleagues and staff
- Store key trial documents
- All key study data stored in one shared cloud
- Use custom alerts
