

PROPEL+LYNK

Connect central research staff with decentralized study teams.

PROPEL Enterprise is your one-stop shop for clinical trial workflow automation and reporting. Seamlessly share data across your entire clinical research network. Empower your sites with LYNK to respond to opportunities in real-time.

Trial Management & Monitoring

Drive buy-in and accountability with transparency into trial status, outstanding tasks, enrollment goals, and performance organization-wide and for each site or study team.

Precise Site Querying

Find the most effective sites in real time by digitally querying site capabilities based on therapeutic expertise, physical site facilities, investigator and staff certifications, and more.

PROPEL Enterprise Features:

- Startup automation metrics capture and analytics
- Pipeline management
- Metrics capture and analysis
