# PROPEL+LYNK

Connect central research staff with decentralized study teams.

PROPEL Enterprise is your one-stop shop for clinical trial workflow automation and project management. Seamlessly share trial opportunities, data, documents, and more with study teams—and receive real-time responses in return.

Trial Management & Monitoring

Drive buy-in and accountability with real-time insights into trial status, outstanding tasks, enrollment goals, and performance organization-wide and for each study team. Quickly identify and address bottlenecks to boost startup efficiency and trial performance.

Powerful Integrations

Seamlessly integrate mission-critical systems including CTMS, IRB, contracts and budgets, grant management, and more. PROPEL serves as the central hub for your tech stack, with data synchronizing across all platforms, providing powerful oversight and reporting.

PROPEL Enterprise Features:

- Startup automation metrics capture and analytics
- Pipeline management
- Metrics capture and analysis
- Trial tracking and monitoring
- Workflow automation
- Query site capabilities
- Real time collaboration with study teams
